

President's Letter

Well hello everyone. First I want to thank everyone who sent cards, emails, texts and calls wishing me a prompt recovery. I really appreciated hearing from you.

I get a lot of teasing about buying a lot of vehicles, but I must admit that the first thing I did upon getting out of the hospital was to get a new all-terrain vehicle. Not a Ford Raptor or a Jeep Rubicon or something like that, but a Walker. Sad to say so, but I'm really needing it (for a few days).

Nuff about me. Now for the important stuff...CAR SHOW.

After months of planning, it will finally happen in a few days. I want to thank Mike Clark for all of his work, and the committee members for their work. I also want thank all the club members who I know will arrive early Saturday morning to help this be a good, fun day.

USE CAR'S EXHAUST TO CLEAN CUSHIONS

Using the exhaust gas of the automobile to clean the upholstery is the accomplishment of a recently invented device. An aluminum attachment is fastened to the exhaust pipe and the engine is allowed to idle. As the exhaust gas passes through this device suction is created at the inlet hole. Collected by a

nozzle, the dust and dirt are drawn through the hose and expelled into the air at the rear of the car. It is made in three models, for cars of different size.

With the car's engine idling, gas from the exhaust creates a vacuum that cleans the cushions
